

## **DeltAg Seed Coat** (formerly Grow Coat)

### **Question and Answer**

#### **Q: What is Seed Coat?**

A: Seed Coat is a dry powdered seed treatment, applied the day you plant, that helps get more plants up and out of the ground with much quicker and healthier growth.

#### **Q: What is in Seed Coat?**

A: A proprietary combination of micronutrients and nutrient catalysts.

#### **Q: How do I mix Seed Coat with the seed?**

A: Simply **SPRINKLE** the Seed Coat over the seed while still in the bag, **SHAKE** the bag and **POUR** the bag into the planter, or **SPRINKLE** the Seed Coat over the seed in the hopper and **STIR** thoroughly. You are ready to **PLANT!**

#### **Q: How much Seed Coat do I apply?**

A: Apply 4 Ounces of Seed Coat per 50 pounds of seed or one (1) ounce per 10 to 12 pounds of seed.

#### **Q: What type seed can Seed Coat be applied on?**

A: Any type seed, (grass seed, crop seed, vegetable seed)

#### **Q: Can you overdose or apply too much to the seed?**

A: **NO!** Only so much will adhere to the seed. For optimum results, always follow label directions.

#### **Q: Is Seed Coat harmful in any way?**

A: **NO!** Seed Coat is all natural.

#### **Q: How long will Seed Coat stay good if I do not use it?**

A: Indefinitely, provided you keep the container closed and the Seed Coat dry!

#### **Q: Does Seed Coat replace seed inoculants?**

A: **NO!** Bacterial inoculants should still be used when planting legumes.

**Q: On what type soils will Seed Coat work?**

A: Any Soil Type

**Q: Will Seed Coat work in any weather conditions?**

A: YES!
